Water Rate Increase

In 2020 and 2022, the City of Hillsboro implemented rate increases, which the board decided not to pass on to our members due to the hardships many were experiencing during the COVID pandemic. Unfortunately, as the overall cost of parts, labor and services have increased significantly over the past few months, it is necessary to pass on a rate increase to our members.

Our water certificate gives members rights to 15,000 gallons a month per certificate. This cap is to prevent over-taxing our system. After much consideration, instead of increasing the overall rates for every customer, the Board voted to increase the rate schedule for gallons used over 20,000 gallons per month. The goal is to re-coup some of the cost increases we are incurring, while keeping our overall rates affordable for our customers and deter overuse that taxes our system and infrastructure.

Below is the new rate structure that will take effect on your May billing statement. Please do not hesitate to call the office if you have any questions.
