Billing Calculation Examples

If you are served by the **Salsbery** Reservoir and your water use for the month is 7520 gallons, you would calculate your bill as follows:

Base fee: \$50.00
 7520 gallons @ 7.52 X 7.26 = \$54.60
Total Bill: \$50.00 + \$54.60 = \$104.60

If you are served by the **Gammon** Reservoir and your water use for the month is 23,300 gallons, you would calculate your bill as follows:

Base fee: \$50.00
 15,000 gallons @ 15. X 8.02 = \$120.30
 5,000 gallons @ 5. x \$10.77 per thousand gallons = \$53.85
 3,300 gallons @ 3.3 x \$19.50 per thousand gallons = \$64.35
Total Bill: \$50.00 + \$120.30 + 53.85 + 64.35 = 288.50
