Billing Calculation Examples

If you are served by the Bald Peak Reservoir and your water use for the month is 8,250 gallons, you would calculate your bill as follows:

Base fee: \$50.00

8,250 gallons @ 8.25 X 9.11 = \$75.13

Total Bill: \$50.00 + \$75.13 = \$125.13

If you are served by the Gammon Reservoir and your water use for the month is 23,300 gallons, you would calculate your bill as follows:

Base fee: \$50.00

15,000 gallons @ 15. X 8.83 = \$132.45

5,000 gallons @ 5. x \$11.85 per thousand gallons = \$59.25

3,300 gallons @ 3.3 x \$21.45 per thousand gallons = \$70.79

Total Bill: \$50.00 + \$132.45 + \$59.25 + \$70.79 = \$312.49
